EXPERIENCE

Gjirafa, Inc - Frontend Developer | Prishtine, Kosovo   Aug 2022 - Present
- Lead frontend developer for a full-end-to-end video platform ecosystem, utilizing JavaScript, Vue.js, Nuxt.js, React.js, Vuex, SCSS, GraphQL, and Axios to design and develop user-facing interfaces.
- Collaborated with design and product teams to understand requirements and ensure the final product met needs. Integrated front end with various APIs and services to deliver high-quality products.
- Implemented features such as JavaScript player, video playback, user registration and login, live stream, and improved platform performance and scalability. Contributed to the platform's successful launch and ongoing success.

WebOrigo - Frontend Developer |Budapest, Hungary   May 2022 - Aug 2022
- Managed technical tasks, debugged, and developed the front end of five major projects, using a range of technologies and collaborating with cross-functional teams to ensure timely delivery and exceptional user experiences.
- Led the development of projects that have garnered a vast audience of over a million monthly users, providing them with seamless navigation and engaging content.

Pythys Software - Full Stack Software Developer | Kuwait City, Kuwait   March 2021 - May 2022
- Developed the back and front end of a live-streaming platform using technology stacks such as Java, Groovy, JavaScript, Vue.js, PostgreSQL, Docker, and Moqui.
- Consistently maintained open and effective communication with clients, ensuring their specifications were met and products delivered with superior quality.
- Coordinated and managed the design and development of Menuz a dynamic restaurant application, enabling users to conveniently browse menus, place orders, and make secure payments with ease.
- Reviewed and provided valuable feedback on over 300 pull requests, ensuring optimal code quality and seamless integration with project goals.

Starlabs - Python Developer Intern | Prishtine, Kosovo   Jan 2021 - March 2021
- Completed a 12-week internship program collaborating with team members, and expanding my skills in web development, data structures, algorithms, and code architecture.
- Contributed to the development of a Q&A platform for Kosovo students using Python, Django, MySQL, HTML, and CSS to enhance their learning experience and facilitate academic success.
- Conducted a comprehensive research study with a sample size of 1000 students to gather valuable insights and feedback about the Q&A platform utilizing various data analysis techniques.
